

Power Box DS Amp

Linear power supply for stereo or mono DS series amps

- Purest & cleanest power using non-switching power supply
- Suitable for Pro-Ject Audio Systems power amplifiers Amp Box DS & Amp Box DS mono
- Replaces original "switching mode" power supplies
- +50% increase of the amplifiers dynamic power output (in combination with one Amp Box DS)
- Significant sound improvement with better dynamics and bass response, improved soundstaging
- Big toroidal transformer with copper shielding
- Very low output impedance
- Filtration capability 40.000 uF capacitors low ESR types
- Available in silver or black

Technical data

Input voltage	AC 230V/50Hz IEC C15 connector (120V/60Hz US)
Output voltage / current	2 sockets 2x48V / 2,5A max
Filtration capacity	40.000 µF
Power consumption	600 watts max
Dimensions W x H x D	203 x 72 x 207mm
Weight	4.200g
Combinations with Amp Box DS & Amp Box DS mono see page 2

Power Box DS Amp: Additional pure power for ultimate amplifier sound!

It is a proven fact that a power supply is a very important part of the audio path and significantly contributes to the sonic quality of an audio product. In order to offer the possibility of improving sound quality, we designed our linear power supplies as an upgrade.

Linear power supply consists of a big toroidal transformer with shielding between primary and secondary winding which acts as an isolation transformer and avoids penetration of interferences from mains into amplifier. This transformer has a big power reserve, compared to a standard power adaptor. It has very low output impedance and in combination with large filtration capability it can easily manage required power of one or two stereo or mono amplifiers.

It is proven by extensive listening tests, that linear power supplies improve the sound of amplifiers significantly, including so-called „digital“ ones. In contrary to many other well known high-end manufacturers, we offer our Power Box DS Amp as a big sound upgrade at an affordable price!

Advice: To avoid magnetic interference do not stack amplifier(s) and Power Box DS Amp!

Possible use of Power Box DS Amp

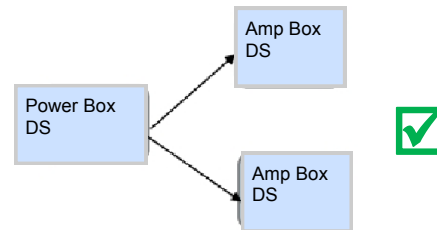

Amp Box DS

Advantages :

- +50% increase of dynamic power 
- overall sound improvement
- far better dynamic and bass response
- better soundstage

2 x Amp Box DS

Advantages :

- overall sound improvement
- better dynamic and bass response
- better soundstage

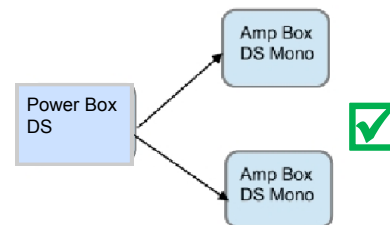

Amp Box DS Mono

Advantages :

- overall sound improvement 
- better dynamic and bass response
- better soundstage

2 x Amp Box DS Mono

Advantages :

- overall sound improvement
- better dynamic and bass response
- better soundstage
