

Debut PRO

09.2021

It's more engaging to me...

From the Pro-Ject Debut PRO, we get a more forward presentation, **better extension on top**, more front-to-back **soundstage depth**.

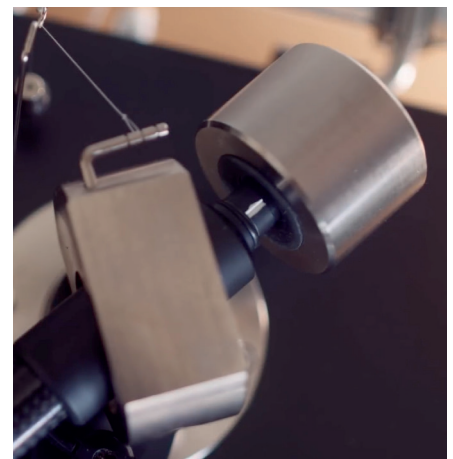

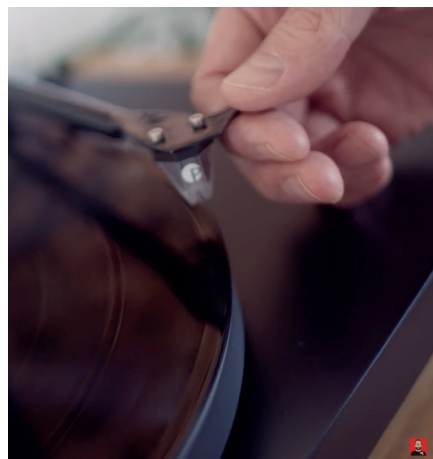

Pro-Ject showed talents in **better layer separation**.

...more evident **textural information** – the surface of instrument's sound...

The tone sounded better: The Pro-Ject gives us a slightly **punchier low end** – **better sub-bass reach**.

The Pro-Ject has a greater sense of **avidity** – **sound more alive**, it sounds more **spritely**, it has more **verve**, more **energy**.

It has **more bounce** it sounds keener – **it's more eager to please**.
