

## Connect it RS

Pure silver & OCC conductor with copper rhodium plated connectors and carbon isolated housing

**Line & Phono Cable:**

**Conductors:** Matched crystal silver

**Cable Capacity:** 71pF (1,23m)

**LS Cable:**

**Conductors:** 4x 0,75mm<sup>2</sup> OCC

**Jacket:** Transparent PVC + RS Jacket

1	Line RS RCA	0,41 / 0,82 / 1,23 / 1,85m	349,00€ - 799,00€ MSRP
2	Line RS XLR	0,41 / 0,82 / 1,23 / 1,85m	399,00€ - 849,00€ MSRP
3	Phono RS RCA	1,23m	599,00€ MSRP
4	Phono RS 5P / RCA	1,23m	649,00€ MSRP
5	Phono RS 5P / XLR	1,23m	649,00€ MSRP
6	LS RS	3,0 / 4,0m	799,00€ / 899,00€ MSRP

## The importance of quality cables

Cables are not able to make your sound system sound better, but they ensure that every detail and information of the signal is transmitted to the dedicated receiving device. Using a poor cable can limit your whole HiFi setup and definitely can be the bottleneck of your sound experience. You can compare it with cars: A sports car with bad tyres still has a lot of power, but it won't be able to bring the performance onto the road. The same applies to sound systems. The best turntables, amplifiers, etc. need quality cables to deliver their full performance.

Our new „Connect it“ cable lineup covers all your needs and not only offers different connection types & technologies, but also various conductor & plug materials.

With our experience of 30 years in HiFi we focused on four cable lines which focus on dedicated materials and built types.

The „Connect it RS“ line features our real high end cables made in Europe!

## Rhodium Carbon - Pure High End

The „Connect it RS“ signal cables use a pure silver conductor for highest conductivity over the whole frequency range. This means that all musical information is preserved and the cable transfers its signal completely neutral without any colouration. Compared to copper, silver does not accentuate the high frequencies, which results in a more detailed and open sound stage. Especially for small phono signals in the millivolt range, the ultra low capacity is a mandatory for a clean signal transmission.

The shielding is done with a pure silver coated OFC helix with a carbon saturated conductive sub-jacket which offers a perfect protection, but also great cable flexibility.

For the speaker cables (LS) we use special high purity OCC copper which is produced with a vertical vacuum continue casting technique. This special design can manufacture ultra-purified crystal copper wires.

All RS-Line connectors feature rhodium plated copper signal pins and are covered by a non-conductive carbon housing.
