

# MX-Stream

Magazine	Country	Review Quote	Conclusion
	United Kingdom	What the MX-Stream does, <b>reliably and repeatedly</b> , is <b>open up the presence of recordings</b> – where it exists – creating something capable of taking the listener by <b>surprise</b> and then going on to <b>delight</b> .	
	Canada	Here we have <b>a remarkable network player</b> whose sound qualities in terms of <b>fluidity, timbre, and timing deliver top-tier musicality. Extremely transparent</b> , it's like an open window to music.	
	Germany	The special ability of the MX-Stream is to make the qualities of the following DA-converter <b>shine in the best possible way</b> by <b>delivering a noise-minimized, almost ideal digital signal</b> .	
	Germany	Among the purist, all-digital streamers, the <b>Musical Fidelity MX Stream is the best-sounding so far</b> .	
	Netherlands	The MX stream <b>does not have „a sound“</b> and that is a very positive feature.	
	Poland	It has a <b>high playing energy</b> and a lot of <b>tonal commitment, good differentiation</b> of sound, <b>beautiful smoothness and juiciness</b> . The sound was always calm. It's <b>100% natural</b> . Built for <b>ultra-purity</b> and <b>super-transparent digital signals</b> .	
	Poland	My level of <b>satisfaction</b> with the quality of the <b>sound</b> provided has reached the <b>apogee</b> . Musical Fidelity designs its devices to <b>last for years</b> .
