

Stream Box S2 Ultra

[Visit the Website](#)

"Strongly recommended to those who don't want to drop big bucks on a networked digital music system."

- Indistinguishable from that using my [Roon] Nucleus+ with Roon to stream audio over my Ethernet-wired network. Not bad for something that **costs only one-third** the Roon server's price.
- The Pro-Ject Pre Box S2 Digital's main sense-oriented effects were its **impact and its beat-emphasizing drive**.
- The Pre Box S2 Digital and Stream Box S2 Ultra together have a **good sense of drive**, yet there was no „digital edge“ – I could listen for **extended periods with my headphones** without fatigue.
- **Voices sounded natural**, backing voices were farther back on the soundstage, and the **bass guitar sounded gentle yet powerful**.
- The two Pro-Ject components **cost about the same as the headphones**, and take up **less space on my desk than a boxed set** of Mozart Piano Sonatas.
