

Stream Box S2

FW and App Update 2023

Android App:

- Updated for Android API Level 33
- New User Interface
- New Tidal Login
- Access to new streaming services

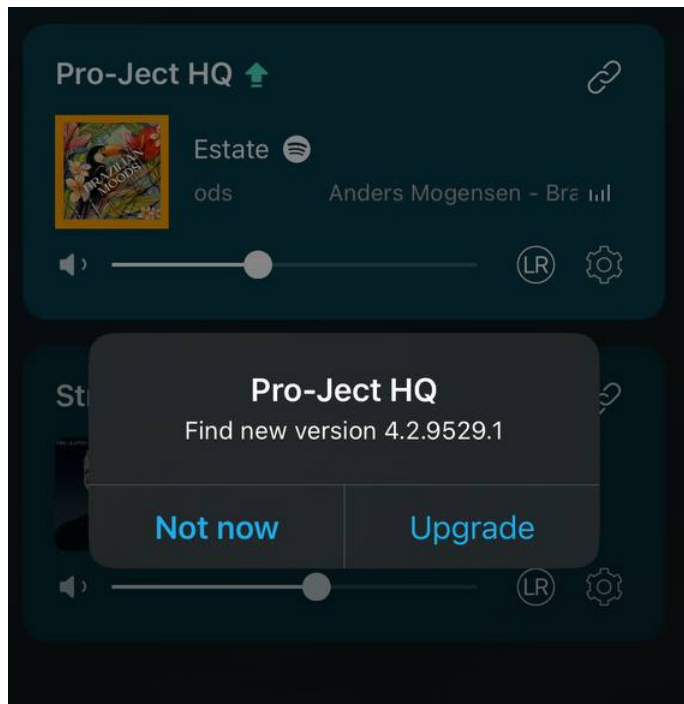

iOS App:

- New User Interface
- New Tidal Login
- Access to new streaming services

Firmware:

- New Tidal Login
- Improved Tuneln integration
- New Amazon Music service
- New Qobuz service
- Various fixes and improvements

The new Apps can simply be downloaded from the respective App stores, and the FW update will happen automatically. Note: Not all units require the FW update, newer units already come with it installed! The latest FW is now available as OTA-update for owners of units with the old Firmware.

The FW update happens automatically. Try a reboot to speed up the process. If you have already downloaded the updated phone App and can already see the new streaming services, this means your Stream Box S2 already came with the latest Firmware installed!
